

HOW TO KNOW IF DISINFECTANTS ARE APPROVED FOR USE AGAINST NOVEL CORONAVIRUS

Find the EPA Registration Number on the product label

EPA Reg. No. 6836-349-1677

Base Registrant
Company Number

Product Number

Sub-Registrant
Company Number

Not all products have a three-part EPA Registration Number. Ecolab-owned registrations are only two-parts.

To verify your product is on the list of [EPA registered antimicrobial products for use against novel coronavirus](#), match the first two parts of the EPA Registration Number.

Note: Searching by product or company name will not yield full approved list.

List of Disinfectants for Use Against SARS-CoV-2

Search for disinfectants registered to use against SARS-CoV-2. Disinfectants are listed by EPA Registration Number (EPA Reg. No.), Product Name, and EPA Company Number (EPA Co. No.). These products are for use against SARS-CoV-2. For more information on disinfectants, visit [EPA's Disinfectants for Use Against SARS-CoV-2](#). For more information on disinfectants, visit [EPA's Disinfectants for Use Against SARS-CoV-2](#). For more information on disinfectants, visit [EPA's Disinfectants for Use Against SARS-CoV-2](#).

Table with 5 columns: EPA Registration Number, Active Ingredients, Product Name, Company, and Other Disinfectant Characteristics and Approvals for the Following Virus. The table lists various disinfectants such as 84 Bleach, Bleach Alternative, and others.

EPA list of registered antimicrobial products for use against novel coronavirus, the cause of COVID-19.
